peoples OPEN .net

The People's Open Network is a local, community–owned Internet that embodies freedom and trust.

What if, when you're not using the Internet, you could share it safely with your community?

Want to get involved?   Visit us at **peoplesopen.net**

You can join the network by installing a node in your windowsill or on your roof. You can also buy a node for those in your neighborhood who cannot afford it to help expand access.

You can also join our working group and contribute as:
an artist,
a coder,
a community organizer
or a human who loves climbing buildings
