

Proposed Working Groups

Installation

The Physical Layer

- Coordinating with site owners
- Installing nodes on rooftops
- Distributing “window” nodes
- Managing inventory of hardware and tools
- Weekend installation outings instead of evening meetings

Infrastructure

The Network Layer

- Developing router firmware
- Developing router front-end software
- Maintaining network maps
- Monitoring status of network and nodes
- Creating software documentation
- Weekly hacknights

Communications

The Community Layer

- Maintaining website, social media, announce list
- Reaching out to building owners
- Organizing workshops
- Developing standardized messaging
- Driving membership growth
- Monthly meetings? Or TBD

WG Lead Responsibilities

- Group specific tasks (e.g. installing nodes, writing code, social media posts)
- Coordinating efforts of other working group members
- Coordinating with other working groups
- Organizing meetings / outings / etc.
- Making sure that new members have things to do
- Delegating as necessary (maybe a lot!)
