WE ARE BUILDING A DECENTRALIZED, LIBRE NETWORK FOR THE EAST BAY!

– a community-owned and operated wireless network for digital communications. This website intends to host documentation, ways to participate in the network, and links to project partners. If you're interested in becoming a participating partner in People's Open Network, please contact us!

INFO@PEOPLESOPEN.NET

we believe in the creation of local internets and locally-relevant applications, the cultivation of community-owned telecommunications networks in the interest of autonomy and grassroots community collaboration, and ultimately, in owning the means of production by which we communicate.
